

# **IQST - IQSTEL Launches IQCortex.ai at Mobile World Congress (MWC) Barcelona — A New AI Proprietary Platform Redefining Business Operations and Control Through Intelligent Orchestration**

**NEW YORK, NY — Feb 26, 2026** — IQSTEL Inc. (NASDAQ: IQST), a scalable global telecom and technology platform, today announced the official launch of **IQCortex** ([www.IQCortex.ai](http://www.IQCortex.ai)), a next-generation AI orchestration proprietary platform designed to fundamentally transform how enterprises manage operations, control risk, and execute decisions at scale.

**IQCortex** will be formally introduced to the global telecommunications and technology community next week at **Mobile World Congress (MWC) Barcelona**, one of the world's largest and most influential industry events.

**IQCortex** is not simply another AI tool — it represents a shift in how businesses operate.

Through its orchestration strategy, **IQCortex** continuously analyzes operational signals in real time and converts them into structured, governed actions. Instead of generating isolated recommendations, the platform coordinates decisions across systems — ensuring that every action is aligned with policy, traceable, and fully accountable.

This approach redefines operational control.

Organizations no longer need to choose between speed and governance. **IQCortex** enables both.

---

## **From Monitoring Data to Orchestrating Action**

Traditional systems monitor data.

**IQCortex** orchestrates action.

The platform connects operational workflows, compliance rules, financial controls, and automation layers into a unified intelligence framework. Every decision is:

- Policy-controlled
- Role-based
- Auditable
- Fully traceable

This allows enterprises to move faster while maintaining transparency and control.

---

## **Built for the Tools Teams Already Use**

**IQCortex** integrates directly into enterprise environments — including Microsoft Copilot, ServiceNow, Jira Service Management, Grafana, Slack, and internal systems — without requiring new dashboards or disruptive system replacements.

Built on the Model Context Protocol (MCP), **IQCortex** securely connects to approved enterprise tools and data sources, delivering governed intelligence directly within existing workflows.

The result: a smarter operational backbone — without organizational friction.

---

## Designed for High-Stakes Industries

IQCortex delivers value across industries where operational precision and compliance are critical:

- Telecommunications
- Financial Services
- Cybersecurity
- Healthcare
- Government and Public Sector
- Critical Infrastructure

In these environments, decisions must be fast — but they must also be explainable.

IQCortex provides both.

---

“**IQCortex** represents the next evolution of AI within IQSTEL,” said **Leandro Iglesias, CEO of IQSTEL**. “Launching this platform at Mobile World Congress (MWC) Barcelona highlights our commitment to delivering enterprise-grade AI proprietary solutions to the global telecom ecosystem. **IQCortex** is about connecting intelligence with accountability — enabling organizations to automate with confidence while maintaining full operational control.”

---

## Expanding Proprietary AI Products and Revenue Contribution

IQSTEL continues to expand its portfolio of proprietary AI-driven products and services as part of its long-term technology strategy.

Through Reality Border and its AI platforms — including **IQCortex**, **IQ2Call**, **AirWeb**, and related enterprise automation solutions — the Company is building a scalable AI division focused on high-margin, enterprise-grade deployments.

IQSTEL’s objective is for its AI division to generate **seven-digit annual revenue by 2027**, representing a meaningful and growing contribution to the Company’s overall profitability profile.

As telecom infrastructure remains the foundation of IQSTEL’s business platform, the expansion of proprietary AI solutions is designed to accelerate margin expansion and enhance blended EBITDA performance over time.

**Safe Harbor Statement:** Statements in this news release may be "forward-looking statements". Forward-looking statements include, but are not limited to, statements that express our intentions, beliefs, expectations, strategies, predictions, or any other information relating to our future activities or other future events or conditions. Words such as "anticipate," "believe," "estimate," "expect," "intend", "could" and similar expressions, as they relate to the company or its management, identify forward-looking statements. These statements are based on current expectations, estimates, and projections about our business based partly on assumptions made by management. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the following: our ability to successfully market our products and services; our continued ability to pay operating costs and ability to meet demand for our products and services; the amount and nature of competition from other telecom products and services; the effects of changes in the cybersecurity and telecom markets; our ability to successfully develop new products and services; our ability to complete complementary acquisitions and dispositions that benefit our company; our success establishing and maintaining collaborative, strategic alliance agreements with our industry partners; our ability to comply with applicable regulations; our ability to secure capital when needed; and the other risks and uncertainties described in our prior filings with the Securities and Exchange Commission.

These statements are not guarantees of future performance and involve risks, uncertainties, and assumptions that are difficult to predict. Therefore, actual outcomes and results may and are likely to differ materially from what is expressed or forecasted in forward-looking statements due to numerous factors. Any forward-looking statements speak only as of the date of this news release, and IQSTEL Inc. undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date of this news release.
